

A. Removing control unit

1 Remove ashtray with holder.

2 Pull out wooden panelling with control unit in forward direction and pull 4 bulb sockets as well as the two 12-pole couplers from control unit.

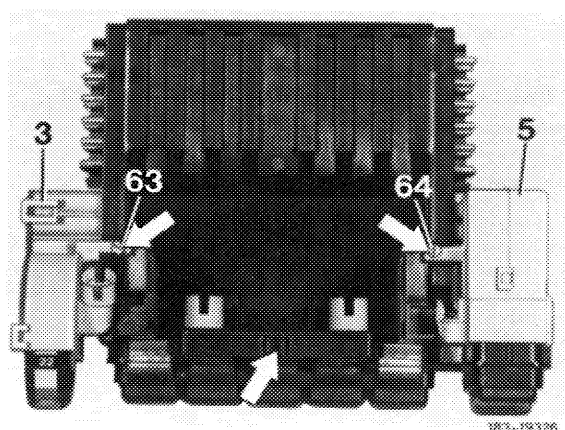

3 Unscrew both screws at the left and right (arrow) and remove control unit from wooden panelling.

B. Removing and installing temperature dial

Removing

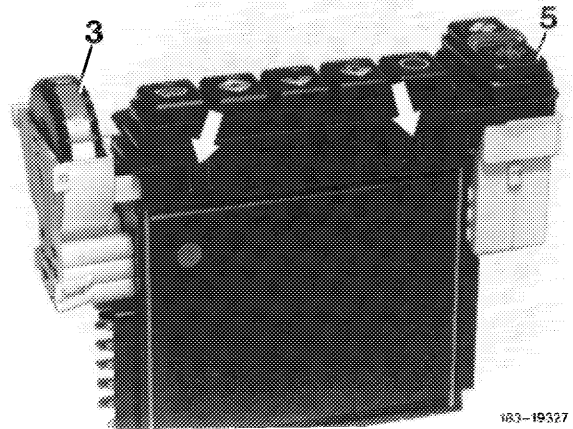

1 Push out clip (63) and the one underneath, pull temperature dial (3) from control unit.

C. Removing and installing blower switch

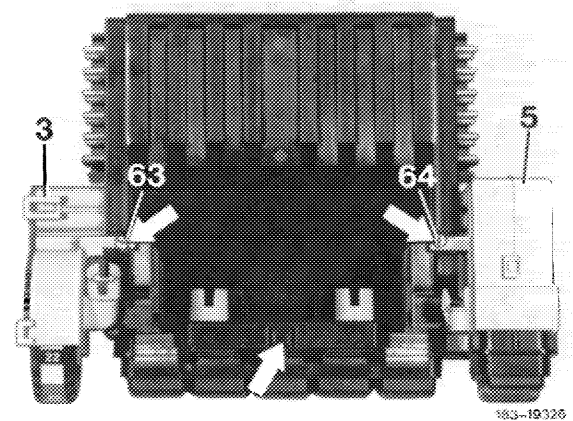

Removing

- 1 Remove plastic cover (refer to arrow) from control unit, starting at blower switch (5), so that pushbuttons are falling out individually. Push out clip (64).
- 2 Unclip blower switch (5) from control unit and pull off.

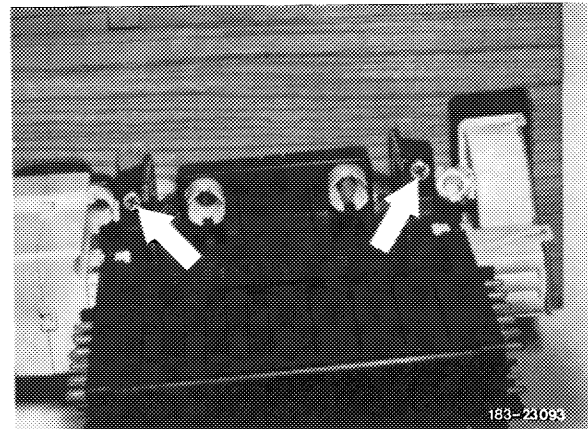

Installing

- 3 Press blower switch (5) with clip (64) against control unit, mount plastic cover. Put back pushbuttons under slight pressure with a rotating motion (pay attention to sequence and position of symbols).

D. Installing control unit

- 1 Insert control unit into wooden panelling and mount by means of two screws (arrow).

- 2 Plug 12-pole couplers left and right, as well as 4 bulb sockets to control unit.
- 3 Insert wooden panelling with control unit into center console.
- 4 Install holder with ashtray.
