

Since February 1974 injection valves are installed with double sealing edge connection:

Former injection valve
Hose sleeve: height 17 mm

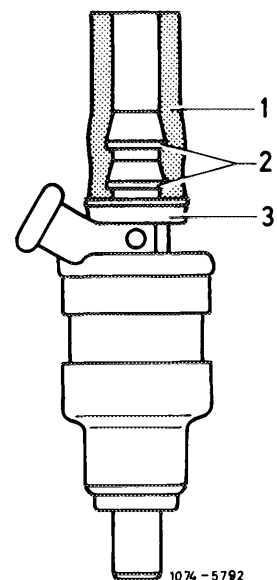

For manufacturing reasons, only the injection valve with double sealing edge connection is installed.

The fuel hose of the injection valve is attached to ring line by means of hose clip part no. 001 997 69 20.

There is no hose clip on injection valve itself.

Modified injection valve

- 1 Fuel hose
- 2 Double sealing edge connection
- 3 Hose sleeve (yellow):
height approx. 5 mm

Installation on production vehicles

Model	Starting chassis end no.
107.043	011376
107.023	009603
107.044	019640
107.024	006980
116.028/029	021345
116.032/033	024450

Spare parts

Designation	Engine	Color code	Part no.
Injection valve	116	yellow	000 078 31 23
	117	blue	000 078 34 23
