

All models

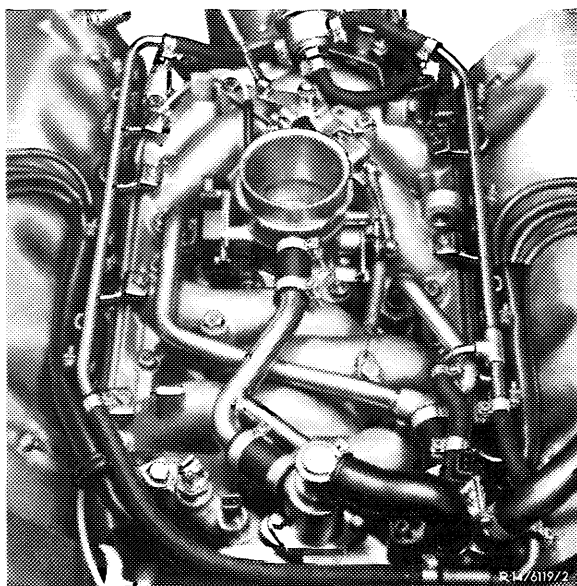

Visual inspection

- Check all parts of fuel system for leakages.
- Check fuel lines and fuel hoses for condition and perfect installation.

- On vehicles with fuel evaporation system, check all parts for condition and leaks.

Check fuel lines and fuel hoses for condition and perfect installation.

- On vehicles with electronically controlled gasoline injection system, be sure to check fuel hoses in engine compartment for leaks and condition.

For this purpose, run engine and check all hose connections immediately upon starting, by moving connecting points manually, for leaks, correct assembly and chafing marks.
